

Good afternoon,

Weather permitting, on Thursday, November 17 between 9:00 a.m. and 3:00 p.m., intermittent 15-minute traffic paces in the southbound lanes of the Northeastern Extension are required to continue work on the Lansdale Interchange overhead bridge.

During the paces, Turnpike maintenance and state police vehicles will restrict southbound Turnpike traffic to a speed of 20-25 miles an hour. There may also be brief, restricted access to the southbound on-ramp at the Lansdale Interchange.

Update November 16th
