HOMEOWNER CERTIFICATION/INSPECTION LIST

1. Smoke Detectors

I the homeowner certify that the smoke detectors in my home are in compliance with the following:

All residential dwelling units shall be provided with a minimum of **one single-station smoke detector on each habitable floor level including the basement and one in each sleeping room.** The smoke detection system must adhere to the requirements of the Building Codes in use at the time of construction. When activated, the smoke detector shall provide an audible alarm to warn the occupants within the individual room or unit. If an individual detector or system of detectors is found to be defective, they shall be replaced with the same type of detector and system that was required when the unit was built. If the dwelling unit is equipped throughout with an electronic system that provides for both security and smoke detection, the system must have the capability of continued smoke detection consistent with the requirements of the Building Codes in use at the time the unit was constructed. The smoke detection capabilities must be maintained in the event that the security portion of the system is abandoned. The smoke detectors on this system must have internal testing capabilities, or an agent must provide a current test and certificate of operation prior to the approval of any change of occupancy.

2. Address Identification

The Township will be checking for proper address identification on mailboxes and houses. They must be 3 ½” - 4” in height at both locations.

3. Curbs and Sidewalks Compliance

The Township will perform an inspection of the curbs and sidewalks for compliance with Section 133-30 of the Township Administrative Ordinance. If there are any code violations to the curb and sidewalk, do you wish them to be clearly marked in the field?

Yes No

SANITARY SEWER CERTIFICATION

4. Sump Pump

If the property is connected to the public sewer system, Township Inspectors must be allowed to enter the premises, under escort of the property owner or authorized representative, to certify that the building sanitary sewer does not receive any storm water discharge from any source including sump pumps and roof drains. Sump pump discharge into the street is NOT permitted. (Code 132-13.C)

5. Sewer Cap

The inspectors will check that the lateral outside has a vent or clean out that is above grade and has a cap that prevents storm water from entering the pipe.

Schedule inspections through the Township by calling (215) 368-7602.
